planning tool

Stop diagrams

Sash distribution

- All designs with an even number of sashes, up to a maximum of 6 per side, are possible.

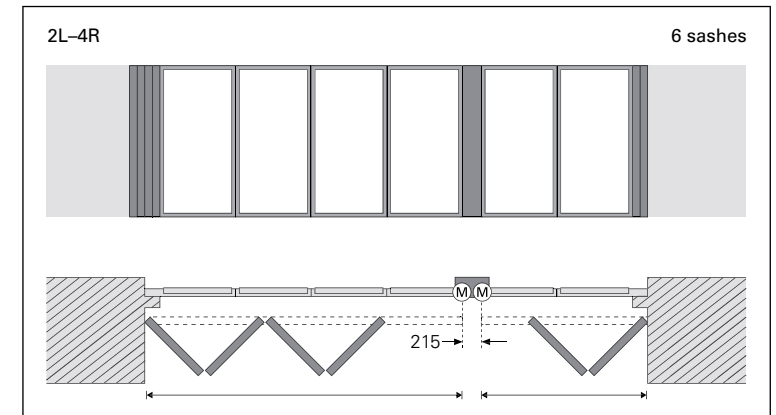

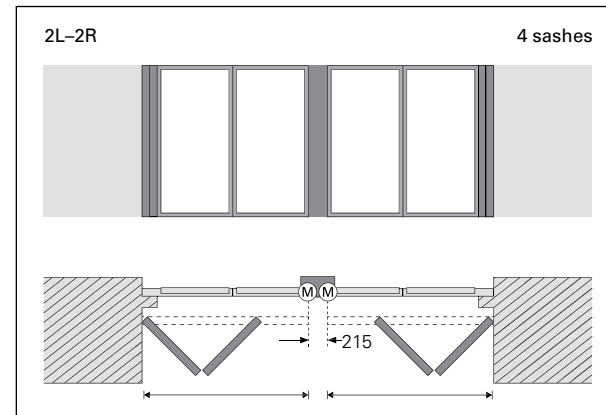

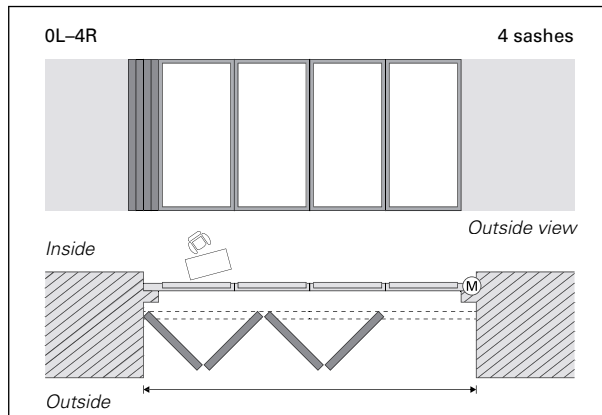

The stop diagrams are sketched as if viewed from inside. The term 2L-4R stands for 2 sashes left (L) and 4 sashes right (R).

The drives are always positioned on the opposing stop side (with all L-R opposing stop diagrams in fixed cross bars).

Examples

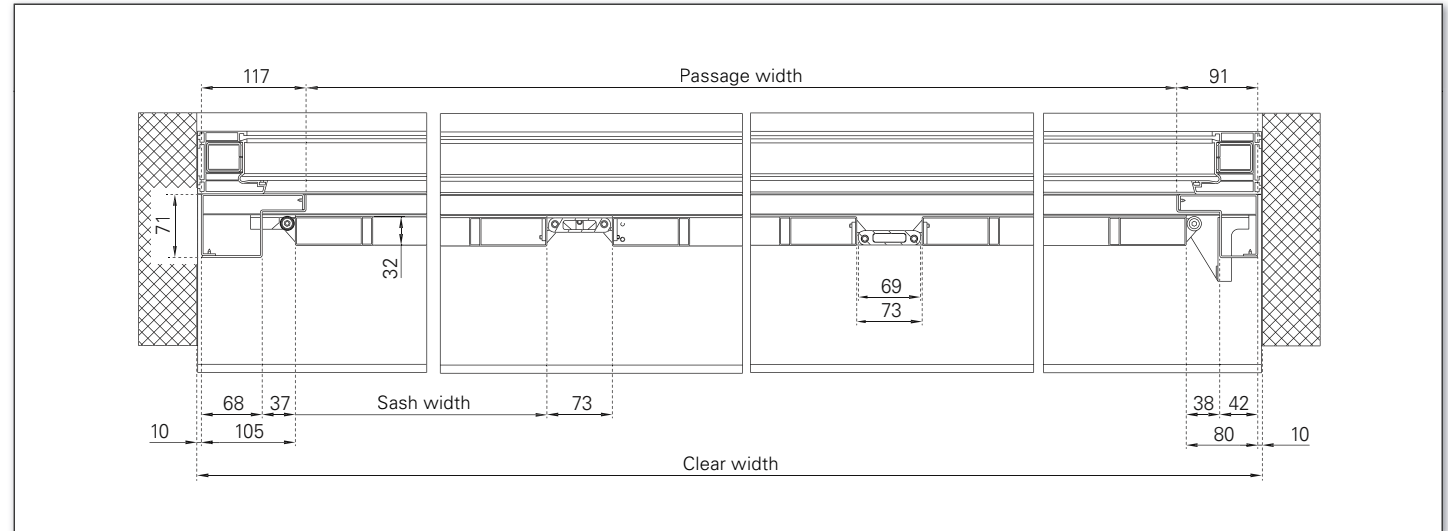

Measuring instructions | Horizontal section

MoveOn

Clear width

- 10 mm (air on the left)
- 10 mm (air on the right)
- 117 mm
- 91 mm

= Passage width

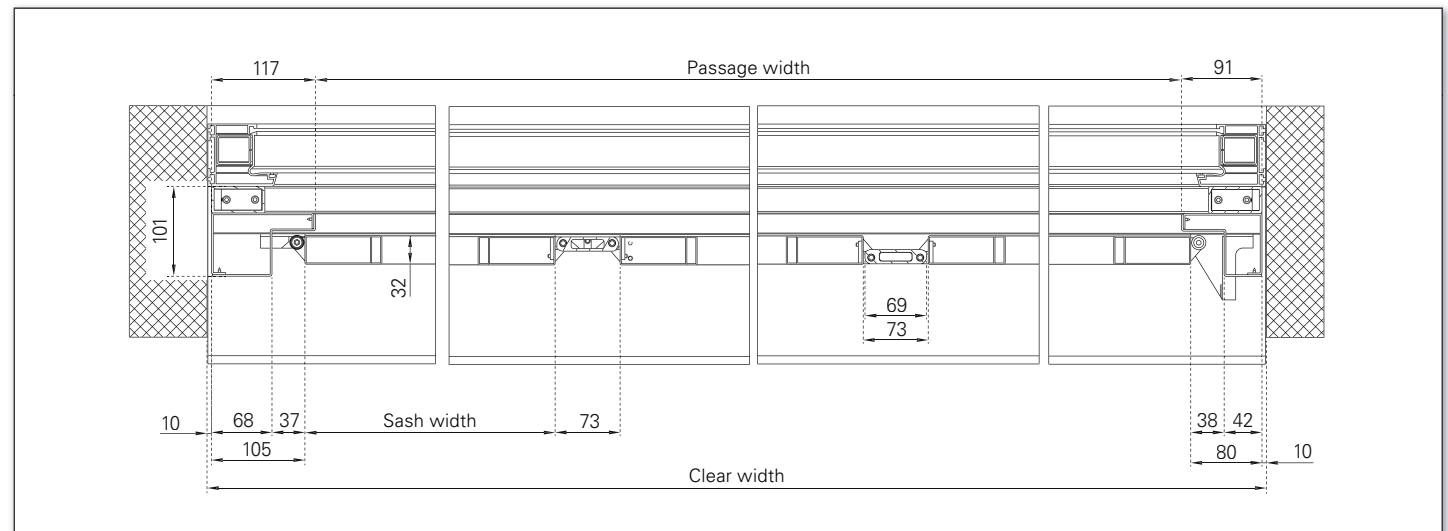

MoveOn with installation frame

Clear width

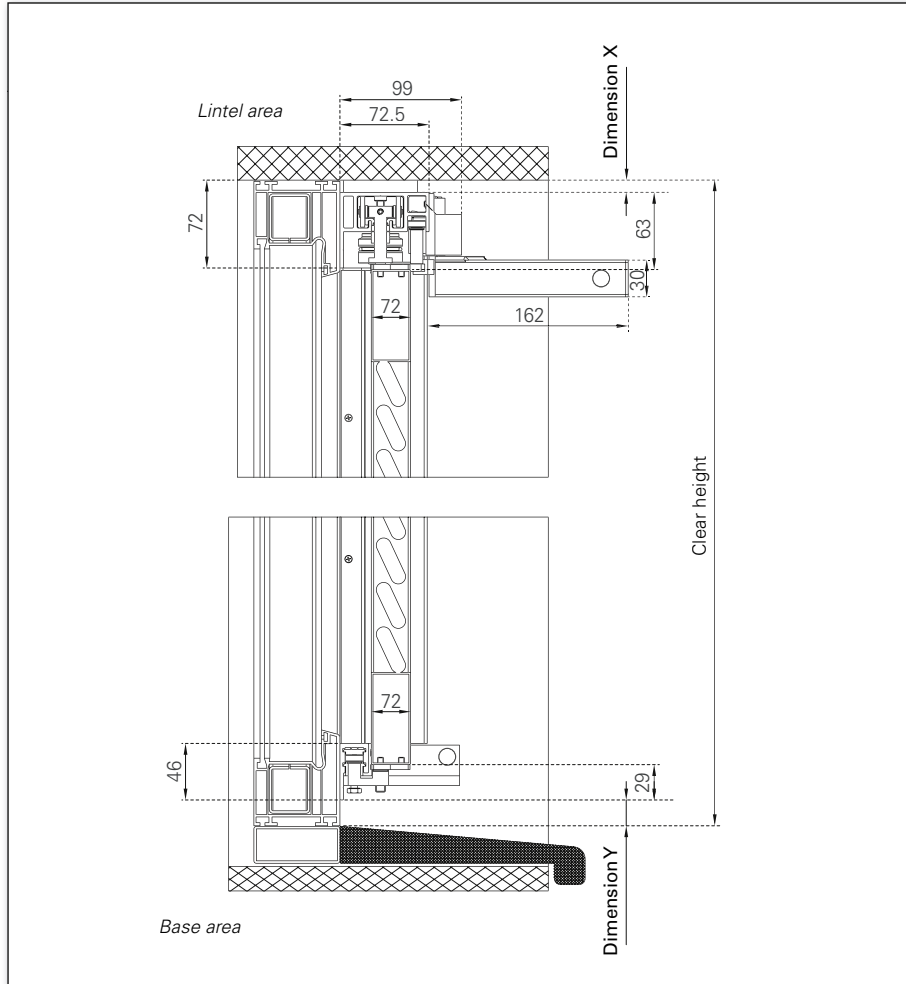

- 10 mm (air on the left)
- 10 mm (air on the right)
- 117 mm
- 91 mm

= Passage width

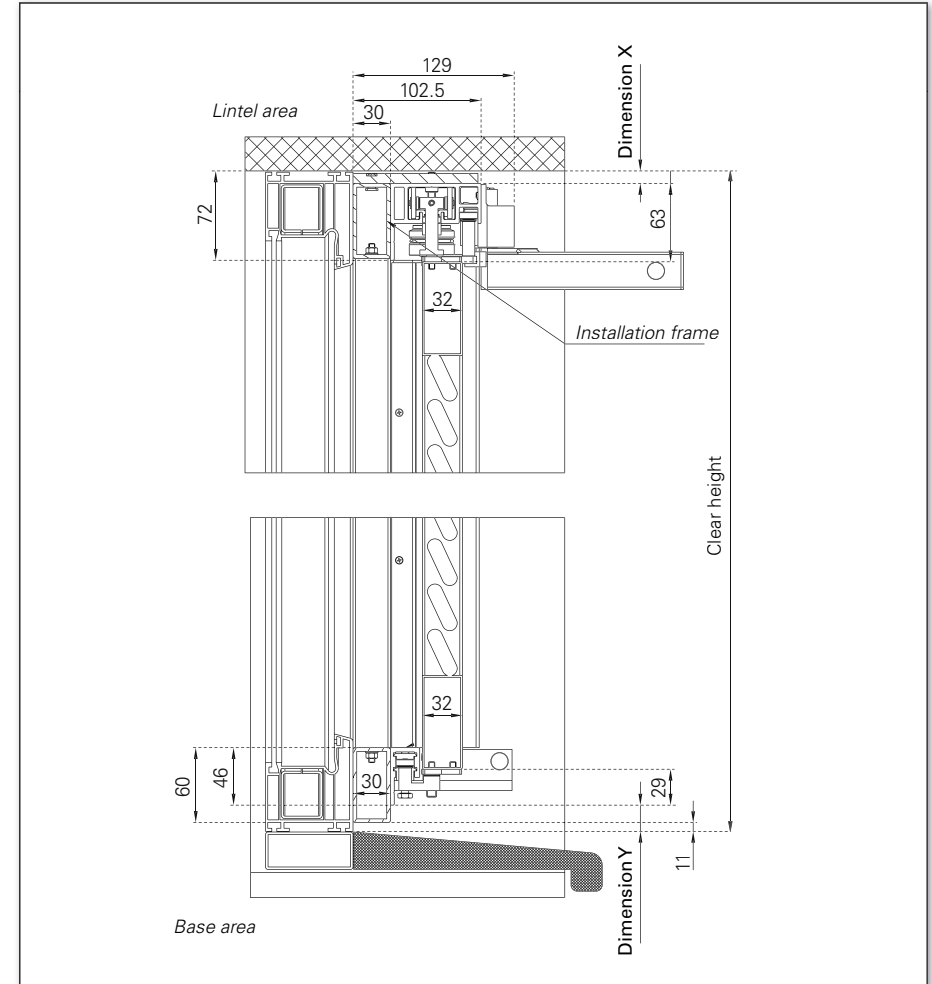

Measuring instructions | Vertical section

MoveOn

- Dimension X: min. 10 mm
- Dimension Y: min. 25 mm with protruding parapet

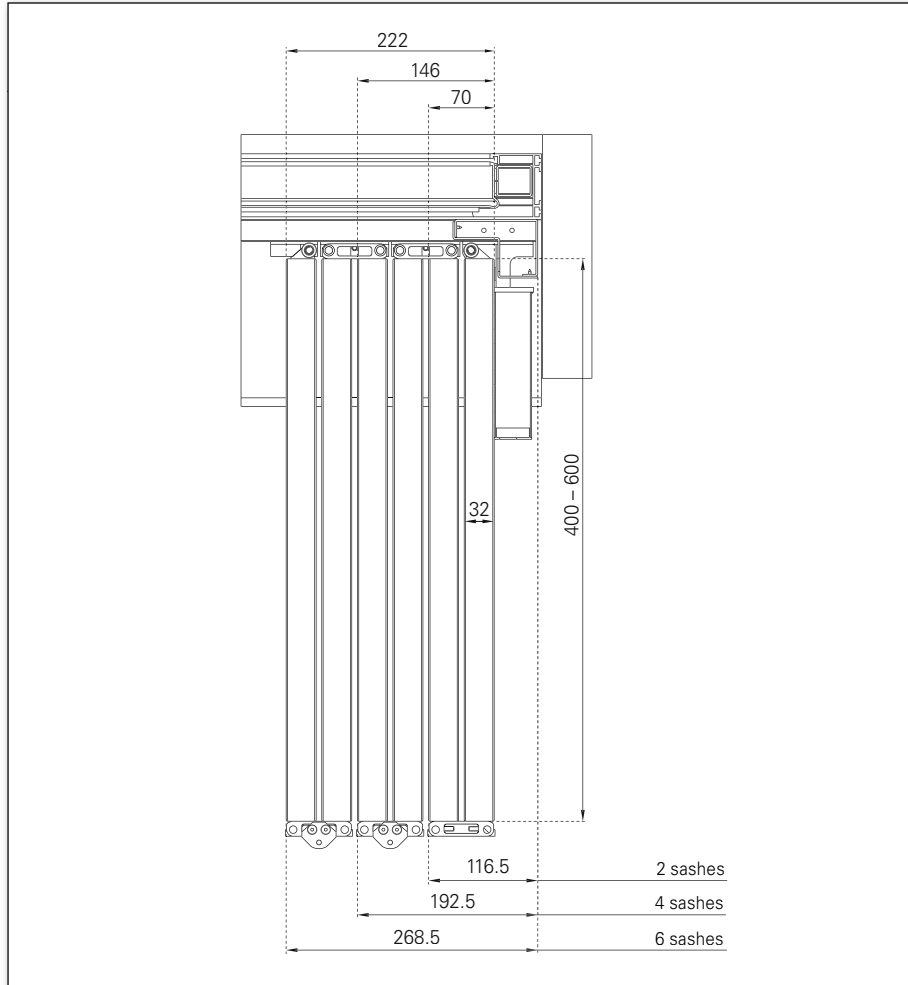

MoveOn with installation frame

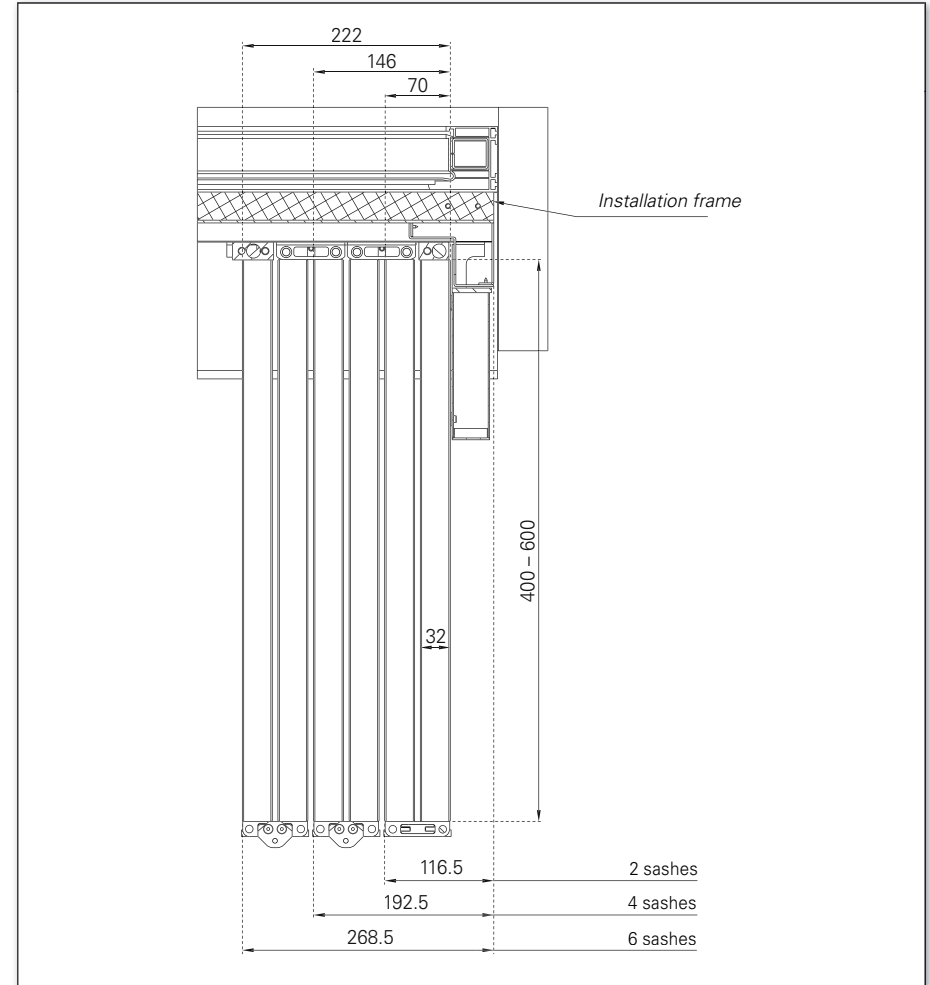

- Dimension X: min. 10 mm
(when screwed through the installation frame to the rear, dimension X can also be greater than 10 mm)
- Dimension Y: min. 14 mm with installation frame

Measuring instructions | System cross-section (package dimensions)
